

Corporate Presentation

December 2010

Grande Cache Coal Corporation

Reader Advisory

In the interest of providing Grande Cache Coal Corporation's ("Grande Cache Coal" or "GCC") shareholders and potential investors with information regarding Grande Cache Coal, including management's assessment of Grande Cache Coal's future plans and operations, certain statements in this presentation are "forward-looking statements" within the meaning of applicable Canadian securities legislation. In some cases, forward-looking statements can be identified by terminology such as "anticipate", "believe", "continue", "could", "estimate", "expect", "forecast", "intend", "may", "objective", "ongoing", "outlook", "potential", "project", "plan", "should", "target", "would", "will" or similar words suggesting future outcomes, events or performance. The forward-looking statements contained in this presentation speak only as of the date of this document and are expressly qualified by this cautionary statement.

Specifically, this presentation contains forward-looking statements relating to: anticipated sales volumes of metallurgical coal in fiscal 2011; management of coal production in fiscal 2011, anticipated future production levels; future pricing; future development activities and related capital expenditures

These forward-looking statements are based on certain key assumptions regarding, among other things: no material disruption in production; no material variation in anticipated coal sales volumes; no material variations in markets and pricing of metallurgical coal other than anticipated variations; no material variation in the anticipated timing of equipment delivery; continued availability of and no material disruption in rail service and port facilities; no material delays in the current timing for completion of ongoing projects; financing will be available on terms favourable to the Corporation; no material variation in historical coal purchasing practices of customers; coal sales contracts will be entered into with new customers; parties execute and deliver contracts currently under negotiation; and no material variations in the current regulatory environment. The reader is cautioned that such assumptions, although considered reasonable by Grande Cache Coal at the time of preparation, may prove to be incorrect.

Actual results achieved during the forecast period will vary from the information provided herein as a result of numerous known and unknown risks and uncertainties and other factors. Such factors include, but are not limited to: changes in general economic, market and business conditions; uncertainties associated with estimating the quantity and quality of coal reserves and resources; commodity prices, currency exchange rates, the availability of credit facilities for capital expenditure requirements, debt service requirements; dependence on a single rail system; changes to legislation; liabilities inherent in coal mine development and production; competition for, among other things, capital, acquisitions of reserves, undeveloped lands and skilled personnel; geological, mining and processing technical problems; ability to obtain required mine licenses, mine permits and regulatory approvals required to proceed with mining and coal processing operations; ability to comply with current and future environmental and other laws; actions by governmental or regulatory authorities including increasing taxes and changes in other regulations; and the occurrence of unexpected events involved in coal mine development and production; and other factors, many of which are beyond the control of Grande Cache Coal. These risk factors are discussed in Grande Cache Coal's Annual Information Form for the fiscal year ended March 31, 2010, as filed with Canadian securities regulatory authorities.

There is no representation by Grande Cache Coal that actual results achieved during the forecast period will be the same in whole or in part as those forecast and Grande Cache Coal does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable securities law.

Grande Cache Coal's fiscal year end is March 31. Amounts are in Canadian dollars unless otherwise stated.

Overview

A pure play metallurgical coal mining company with resources in excess of 235 million tonnes.

Stock symbol: TSX:GCE
 Shares issued: 97.4 million
 Fully Diluted: 98.6 million
 52-week High/Low: \$9.80 - \$3.81*
 Market cap: ≈ \$950 million*
 Cash \$55 million
 Working Capital \$96 million
 Virtually No Debt, No Major Shareholders

As at September 30, 2010 * As at November 22, 2010

Grande Cache Coal Corporation

Strategy

Organic growth through increased production of existing resources

- 55 million proven and probable reserves
- 238 million tonnes of resource

Lower Costs

- New Equipment
- Facility and process improvement

Maintain strong financial position

- Increased cash flow
- Balance sheet strength

No Harm

- Safety
- Environment

Pursue accretive acquisition opportunities

Grande Cache Coal Corporation

Investment Highlights

- GCC offers high degree of leverage to coking coal markets
- Strong global steel industry and tight supply environment for seaborne coking coal resulting in strong prices for metallurgical coal products
- Medium to longer term market fundamentals remain favorable as new supply is limited and challenging due to location, infrastructure, safety and cost issues
- Production growth from current levels of 1.7 million tonnes to 3.5 million tonnes by fiscal 2013
- Total Capital expenditures of \$225 million required over this period
- Strong cash position and minimal debt will allow GCC to pursue new opportunities

Factors Driving the Metallurgical Coal Market

- Strong producer discipline in the recent economic downturn
 - Avoided oversupply and allowed the supply chain to run lean through low demand period
- Economic growth has reappeared
 - China and India continue growth and OECD countries returning to pre-crisis levels
 - China estimated to represent >50% of the steel market in 2010
- Chinese reliance on import coal is continuing
 - China imported 34 million tonnes of metallurgical and injection coal in 2009
 - China domestic supply constrained by safety, quality and environmental issues and rising costs
 - China is no longer an exporter of coking coal
- Continued constraints on new supply from existing and emerging coalfields
 - Infrastructure constraints in traditional supply regions continue
 - Significant new coal production several years away (i.e. Mozambique – 2013)

Global Steel Market

- Global steel production has increased steadily since April 2009
- Over 50% of the world steel production capacity is in China
- World Steel Association forecasts apparent steel use increase of 10.7% to 1.24 billion tonnes in 2010

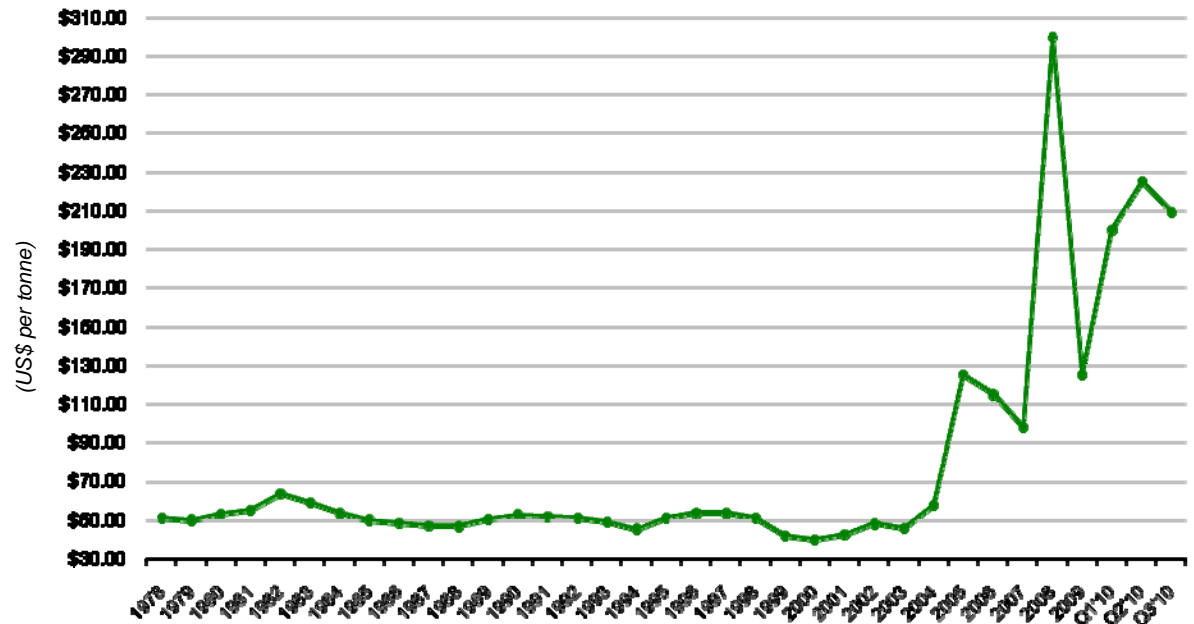

Source: World Steel Association

Benchmark Hard Coking Coal Price

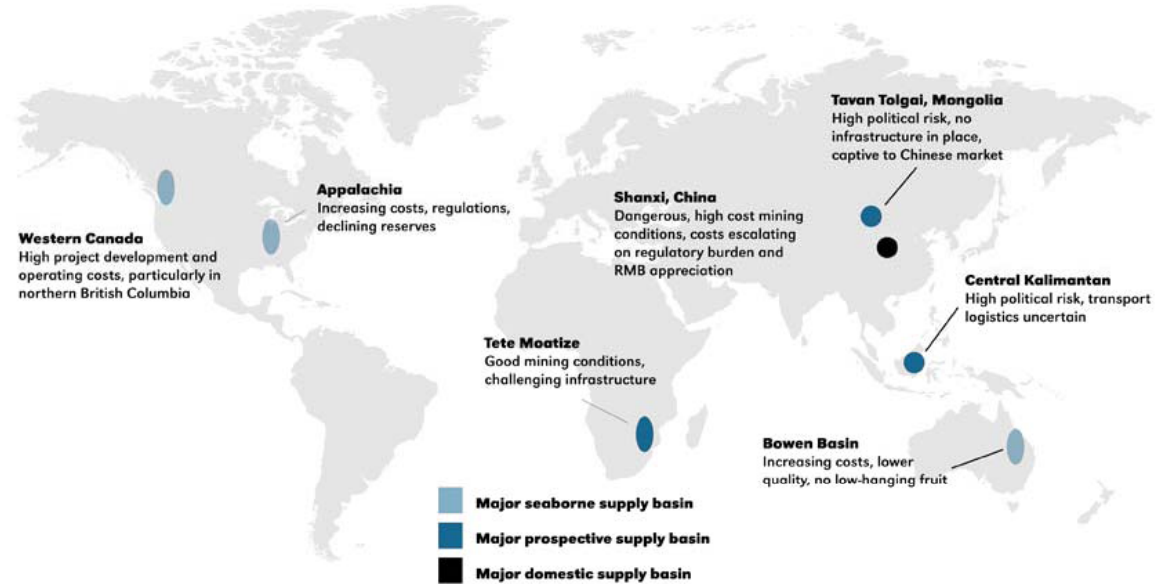

- Quarterly pricing has been introduced and accepted in 2010
- Market demand and supply remains tight for HCC
- Benchmark Price
 - Q-1 US \$200
 - Q-2 US \$225
 - Q-3 US \$209

Major Coking Coal Supply Regions

Increasing costs, infrastructure constraints and political uncertainty highlight obstacles in coking coal supply

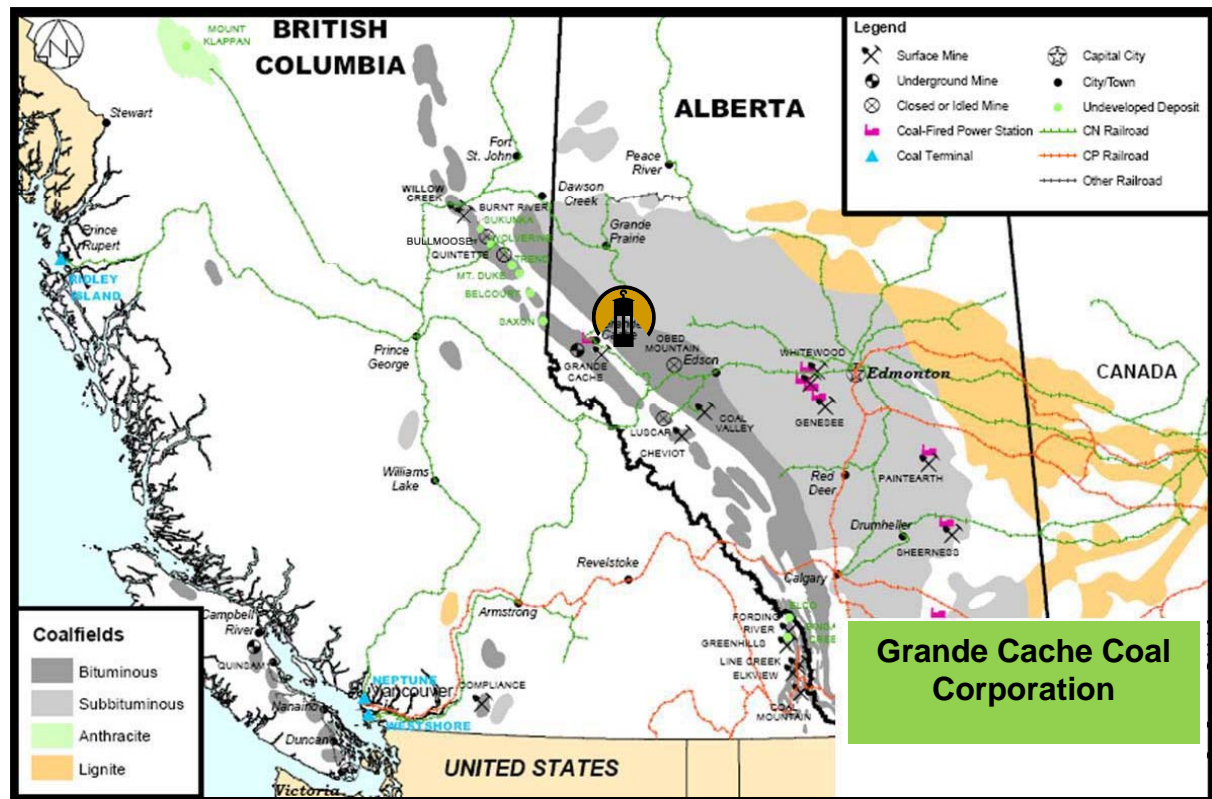

Source: IEA, ABARE Macquarie Capital (USA)

Coal Operations In Western Canada

- GCC located in west central Alberta in Rocky Mountains
- All product is railed via CN Rail
- Westbound coal shipped via Westshore Terminals in Vancouver, BC
- CN Rail can provide access to Ridley Terminals

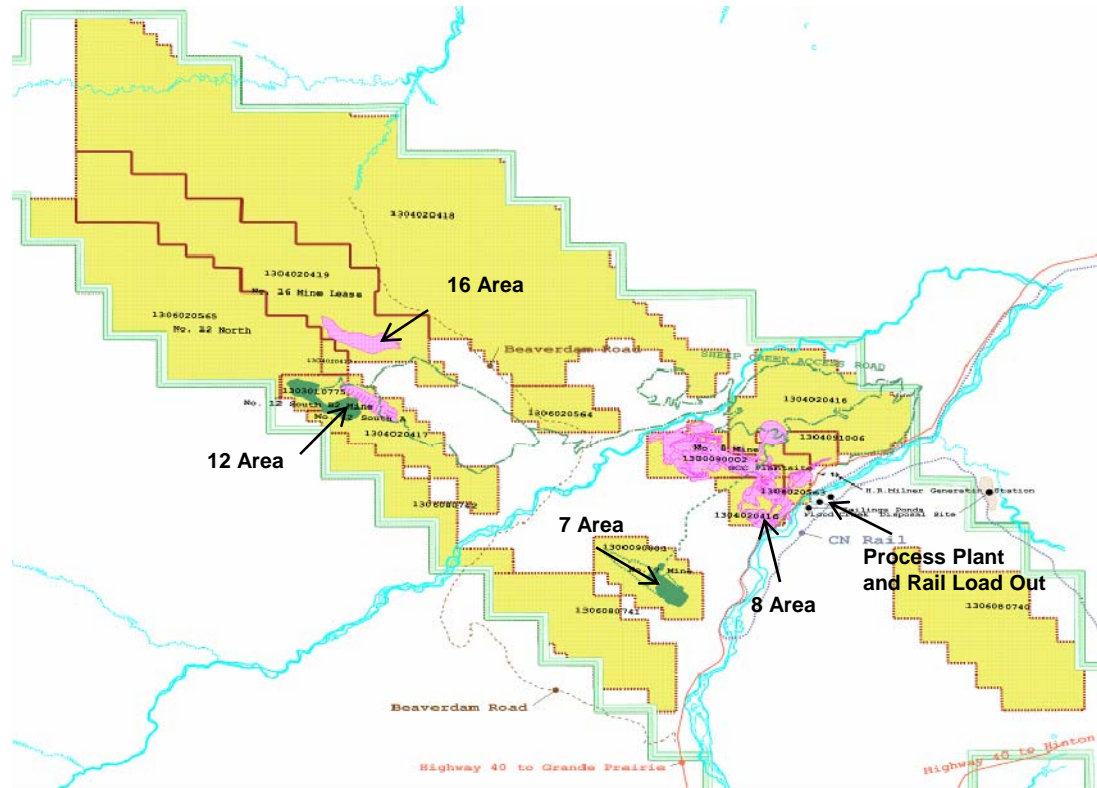

Grande Cache Coal Corporation

Mining Operations

- Operating both surface & underground mines
- Process facility has annual capacity of +3.0 million mt
- Historically over 3.5 million mt annually has been produced
- Provides direct employment for over 575 individuals on a full time basis

Reserves & Resources

	Status	(ROM)	Saleable	Indicated & Inferred
No. 7 Underground	Production	1.85	1.36	3.3
